

Genetic Profile Test Results

Horse: SSFR Up the Ante

Owner: Kimberlee Tilton

Horse and Owner Information

Horse	SSFR Up the Ante	DOB	2017-04-25
Breed	Gypsy Vanner	Age	0 years, 0 months
Color	Silver Dun	Sex	Stallion
Discipline	Height
Registry	GVHS	Reg Number	pending
Sire	The Real Deal	Dam	R Cameo
Sire Reg & No.	GVHS GV02848	Dam Reg & No.	GVHS GV03020
Comments		

Owner	Kimberlee Tilton	Address	PO Box 1713
Phone	206.551.4859	City, State	Woodland, WA
Email	lcrgypsydrum2016@yahoo.com	Postal Code	98674

Genetic Profile Test Results

Horse: SSFR Up the Ante

Owner: Kimberlee Tilton

Results Summary

Coat Color: SSFR Up the Ante has one Red allele and one Black, indicating his base coat color appears Black. One Dun allele was detected which may dilute base coat color. One Silver allele was detected which may also dilute base coat color. One Dominant White 20 allele was detected which may result in White markings. As a result of the allele count in each of the following, he has a minimum 50% chance of passing Red or Black, and 50% Dun and/or Silver and/or Dominant White 20 to any offspring.

Allele Summary: aa, Ee, D/nd2, Z/n, W20/n, TT (Endurance Type)

Traits: SSFR Up the Ante has not tested positive for any recessive disease alleles on this panel.

Please note: Your analysis is ongoing and may include some regions marked with an asterisk denoting the following.
* Discovery - This gene detection is in the early stages of discovery and will have varying reliability results.
** Inconclusive - Not a bad omen! Simply put, the gene of interest did not reveal itself (neither a positive nor a negative; no result, therefore unknown).

Coat Color Results

Base

Agouti	-/-	<i>ASIP</i>	aa - No dominant Agouti alleles detected; restricts any Black base to appear Bay.	More about A
Black/Red	+/-	<i>MC1R</i>	Ee - One Black allele detected and one Red.	More about E

Modifier

Brindle/IP	-/-	<i>IKBK</i>	No Brindle/IP alleles detected.	More about IP
Grey	-/-	<i>STX17A</i>	No Grey alleles detected.	More about G

Dilution

Champagne	-/-	<i>SLC36A1</i>	No Champagne alleles detected.	More about CH
Cream	-/-	<i>SLC45A2</i>	No Cream alleles detected.	More about CR
Dun	+/,+/-,-,+/-	<i>TBX3</i>	D/nd2 (Dun). One Dun allele and one non-dun2 allele detected. Can produce non-dun offspring without primitive markings.	More about Dun
Pearl	-/-	<i>SLC45A2</i>	No Pearl alleles detected.	More about prl
Silver	+/-	<i>PMEL17</i>	Z/n - One Silver allele detected.	More about Z

Coat Color Results, continued

White Patterns Results

Dominant White	+/-	<i>KIT</i>	W20/n - One Dominant White 20 allele detected (DW1-21).	More about DW
Frame Overo (LWO)	-/-	<i>EDNRB</i>	No Frame Overo (LWO) alleles detected.	More about LWO
Leopard Complex Spotting (LP)	-/-	<i>TRPM1</i>	No Leopard Complex Spotting (LP) alleles detected.	More about LP
Pattern 1 (LP modification)	-/-	<i>RFWD3</i>	No Pattern 1 (LP modification) alleles detected.	More about PATN1
Splashed White (MITF)	-/-,-/-	<i>MITF</i>	No Splashed White 1 nor Splashed White 3 alleles detected.	More about SW (MITF)
Splashed White (PAX3)	-/-,-/-	<i>PAX3</i>	No Splashed White 2 nor Splashed White 4 alleles detected.	More about SW (PAX3)
Sabino 1	-/-	<i>KIT</i>	No Sabino 1 alleles detected.	More about SB1
Tobiano	-/-	<i>ECA3</i>	No Tobiano alleles detected.	More about TO

Health Genetics 1

Immune System

Foal Immunodeficiency Syndrome	-/-	SLC5A3	No Foal Immunodeficiency Syndrome alleles detected.	More about fis
Severe Combined Immunodeficiency	-/-	DNAPK	No Severe Combined Immunodeficiency alleles detected.	More about scid
West Nile*	-/-	OAS1	Normal susceptibility to West Nile Virus.	More about WNVR*

Muscle Disorders

Glycogen Branching Enzyme Deficiency	-/-	GBE1	No Glycogen Branching Enzyme Deficiency alleles detected.	More about gbed
Hyperkalemic Periodic Paralysis	-/-	SCN4A	No Hyperkalemic Periodic Paralysis alleles detected.	More about HYPP
Malignant Hyperthermia	-/-	RYR1	No Malignant Hyperthermia alleles detected.	More about MH
Myotonia	-/-	CLCN4	No Myotonia alleles detected.	More about myt
Polysaccharide Storage Myopathy (type 1)	-/-	GYS1	No Polysaccharide Storage Myopathy (type 1) alleles detected.	More about PSSM1

Health Genetics 2

Neurologic Disorders

Cerebellar Abiotrophy	-/-	<i>MUTYH</i>	No Cerebellar Abiotrophy alleles detected.	More about ca
Lavender Foal Syndrome	-/-	<i>MYO5A</i>	No Lavender Foal Syndrome alleles detected.	More about lfs

Reproductive Disorders

Androgen Insensitivity	-/-	<i>AR</i>	No Androgen Insensitivity alleles detected.	More about as
IAR - Subfertility*	+/-,+/+	<i>FKBP6</i>	Three IAR Subfertility* alleles detected; likely no effect.	More about iar*

Skin Disorders

Hereditary Equine Regional Dermal Asthenia	-/-	<i>PPIB</i>	No Hereditary Equine Regional Dermal Asthenia alleles detected.	More about herda
Junctional Epidermolysa Bullosis (type 1)	-/-	<i>LAMC2</i>	No Junctional Epidermolysa Bullosis (type 1) alleles detected.	More about jeb1
Junctional Epidermolysa Bullosis (type 2*)	-/-	<i>LAMA3</i>	No Junctional Epidermolysa Bullosis (type 2*) alleles detected.	More about jeb2*
Warmblood Fragile Foal Syndrome	-/-	<i>PLOD1</i>	No Warmblood Fragile Foal Syndrome alleles detected.	More about WFFS

Other Genetics

Trait Genetics

Lordosis*	-/-,-/-,-/-,-/-	<i>ECA20</i>	No pattern of Lordosis* alleles detected.	More about L*
Curiosity/Vigilance*	+/+	<i>DRD4</i>	Cur - GG - Two Curiosity alleles detected; likely more curious than vigilant.	More about Cur/Vig
Myostatin/Speed	-/-	<i>MSTN</i>	TT (Endurance Type) - Two Endurance alleles detected; likely Endurance ability over Sprint.	More about MSTN
Gait	-/-	<i>DMRT3</i>	No Gait alleles detected.	More about Gaited

Inheritance Probabilities

Coat Color

Coat Color Inheritance Probabilities: The bar graph above depicts the number of alleles for specific coat color phenotypes based upon your horse's genetic testing results. Completely filled red bar represents two such alleles (homozygous) and a half-filled yellow bar represents one such allele (heterozygous).

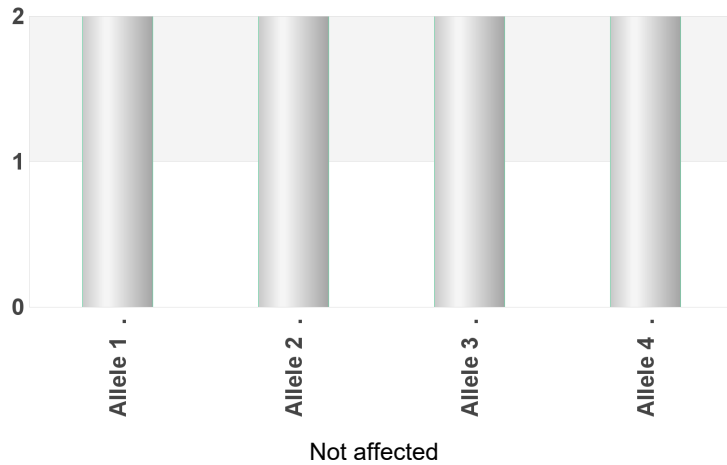

Genetic Profile Test Results

Horse: SSFR Up the Ante

Owner: Kimberlee Tilton

Inheritance Probabilities

Lordosis

IAR Subfertility*

Multi-allele Risk Charts: Each chart represents a trait, and each bar indicates a distinct risk or allele presence. These act in combination to produce the trait. A red bar indicates the horse carries 2 risk alleles at the site; a partly-yellow bar indicates 1 risk allele; and a fully-grey bar indicates 0 risk alleles. If all bars are red, then the horse carries two risk alleles at each risk site and is likely affected. If all bars contain yellow or red, but are not all red, then the horse is likely a carrier. Otherwise, the horse is not a likely a carrier of the tested trait.

Defining Genetics & More Info

Allele:	One of two or more alternative forms of a gene that arise by mutation and are found at the same place on a chromosome.
Alleles: Heterozygous vs. Homozygous?	Allele calls are written in a way that denotes their origin and whether they are DOMINANT (uppercase) or recessive (lowercase). For example, at MC1R (also known as extension), Black is dominant and thus written as "E" whereas Red is recessive and thus denoted as "e". Therefore, an EE horse is homozygous for Black (and thus appears black), an ee horse is homozygous for Red (appears Red), and an Ee horse is heterozygous (shows the dominant allele, thus is Black).
Gene:	A unit of heredity that is transferred from a parent to offspring and is thought to determine some characteristic of the offspring.
Genotype:	The genetic constitution or make up of an individual organism.
Heterozygous:	A pair of genes which are different (not the same). One is typically dominant and one recessive.
Homozygous:	A pair of genes that are identical (of one type).
Phenotype:	The observable or visible characteristics of an individual resulting from their genotype or the interaction of their various genes and environment.

The results depicted in this report do not constitute veterinary or medical advice. Any medical or veterinary advice should be sought from your veterinarian regarding these results or any health issues or questions you may have about your animal. Breed, sex, gene interaction, unknown genes and individual variances may impact the results, phenotypes, and behaviors in any animal in unknown and unpredictable ways. Please be advised that your animals' health is important to us and you should feel free to contact us should you have any further questions or feedback on our diagnostic platform, results reporting, or general questions. We value your input and thank you!
